Vegan and Keto Friendly Ice Cream Stabilizer

Elgin, IL (February 19, 2021) Profile Food Ingredients is now introducing their latest product line for traditional and non-traditional frozen dessert applications. Many vegan and keto products in the frozen dessert market tend to have issues providing the stability, consistency of texture, and mouthfeel of traditional dairy frozen desserts. PFI's latest product line helps enhance the creamy texture of non-traditional offerings to better mimic the qualities of traditional frozen desserts. No longer is it an issue to wait 15 minutes for the product to soften to allow for easier scooping. PFI's specialized blends allow you to enjoy your treat directly out of your home freezer! In addition, Profile's stabilizer/emulsifier combinations protect the finished product from temperature abuse due to fluctuations during transportation or while in the store freezer.

The new product line is clean-label, GMO-free, allergen-free and has the capability of being suitable for use in vegan and keto applications.

Check out N!ck's Swedish ice cream, one of PFI's successful customers. Currently, N!ck's is the #1 new release on Amazon: <https://www.yahoo.com/lifestyle/ice-cream-brand-amazon-no-215551976.html>

PFI has vast experience in developing, formulating, and supporting its customers in all phases of stabilization for their products. In addition to our existing line of products, PFI can custom blend a system specific to your needs.
